

In 2020 2 families and I went in on raising 2 pigs and 6 turkeys. We had arranged for the pigs to be pastured at a different location, along with cows we hadn't found just yet, in exchange for fence maintenance on the pasture.

2 new piggies.

The cows never happened. The pigs lived with a friend for a month.

The cows never happened and the pasture owner discovered he was, perhaps, too old, to deal with 3 pigs by himself. He called after a month to cancel the pasture offer and ask we come get the pigs.

We were in the middle of tearing up 2 floors in the house. We dropped everything, sourced and built a pig house and solid strand electric fence.

Pallet house - Pallet porch.

Piggies are home.

Fence vs Rock
